Hidden treasures: Turning food waste into glass 24

I.A. Cornejo, S. Ramalingam, J.S. Fish, and I.E. Reimanis

New research shows glass and glass-ceramics can be made using only mineral content of food waste ash.

Manufacturing of aluminum nitride powder for advanced applications 28

Mohan Ramisetty, Suri Sastri, and Uday Kashalikar

Production of aluminum nitride powder by direct nitridation or carbothermal reduction and nitridation requires balancing trade-offs between cost, carbon footprint, and properties.

Developing processing maps for implementing flash sintering into manufacture of whiteware ceramics 32

Fabio Trombin and Rishi Raj

Flash sintering could lead to energy savings payoffs for ceramic manufacturers.

Researchers levitate liquid metal oxide ceramics in mid-air to abuse them

Maybe it was frustration at failed experiments, publication woes, or decreased funding for science, but one thing seems to be true—researchers have taken their frustrations out on ceramics.
