- Sustainable materials
- Transport Properties

Future Planned Meetings/Activities (from Nov. 2016 – October 2017):

The 8th Advances in Cement-based Materials meeting is under preparation with tentative date of Summer 2017 and tentative location: Atlanta, Georgia.

New Initiatives/Opportunities:

The Cements Division has been successful in attracting new members and increasing participation in terms of posters and presentations during annual meeting. The Division will continue to attract new attendees by offering keynote talks by prominent speakers and unique workshops that enhance participants' research skills.

The Division still considers modifications to the meeting format and keeps the program, including a keynote talk by a prominent speaker opening each day of the meeting. The poster session was very well attended and vibrant conversations took place; as such the Division plans to maintain this format.

The Division had an inaugural YouTube research video contest this year and selected the winners. This was very attractive alternative to traditional forms of data dissemination and will be continued in the subsequent meetings.

Additionally, the Divisions meeting has large student participation and this year we will also select student officers to create better dialogue between the students and Division in general. Student only sessions are also considered.
