## feature articles

20

### Lighter, tougher, and optically advantaged: How an innovative combination of materials can enable better car windows today

*A thin, lightweight glass-glazing solution can help the automotive industry reduce the weight of vehicles to meet stringent fuel economy standards and improve vehicle performance.*

by Thomas Cleary, Timothy Hutten, Vikram Bhatia, Yousef Qaroush, and Michael McFarland

28

### 3-D printing of polymer-derived CMCs for next-generation turbine blade manufacture

*A novel additive manufacturing method incorporates preceramic polymers to enable development of next-generation ceramic-matrix composites for advanced turbine blades.*

by Daniel J. Thomas

31

### Novel crystal structures for familiar semi-conductor materials: Cloud-aligned indium gallium zinc oxide composites hold promise for next-generation devices

*A novel crystal structure of indium gallium zinc oxide exhibits functionalities of a composite material and may have mass application in next-generation display devices.*

by Haruyuki Baba, Motoki Nakashima, and Shunpei Yamazaki

34

### Stretched exponential relaxation of glasses: Origin of the mixed-alkali effect

*A novel atomistic simulation method allows direct access to long-term dynamics of glass relaxation at room temperature.*

by Yingtian Yu, John C. Mauro, and Mathieu Bauchy

As seen in the April 2017 ACerS Bulletin...

Materials with market value: Global ceramic and glass industry poised to reach \$1T

The global ceramic and glass industry is expected to grow at an overall compound annual growth rate of 6.2% over the next few years. Traditional glass and ceramics comprise 89% of the global market; however, growth will be largest in technical ceramic sectors in the next five years.

As seen on Ceramic Tech Today...

Flexible glass builds lab-on-a-chip devices for medical diagnostics, sensors, more

Using common manufacturing processes, researchers at Brigham Young University have fabricated thin and flexible glass chips, layer by layer, to build nanoelectromechanical systems that offer new directions for medical diagnostics, sensors, and more.

American Ceramic Society Bulletin covers news and activities of the Society and its members, includes items of interest to the ceramics community, and provides the most current information concerning all aspects of ceramic technology, including R&D, manufacturing, engineering, and marketing. American Ceramic Society Bulletin (ISSN No. 0002-7812). ©2015. Printed in the United States of America. ACerS Bulletin is published monthly, except for February, July, and November, as a "dual-media" magazine in print and electronic formats ([www.ceramicbulletin.org](http://www.ceramicbulletin.org)). Editorial and Subscription Offices: 600 North Cleveland Avenue, Suite 210, Westerville, OH 43082-6920. Subscription included with The American Ceramic Society membership. Nonmember print subscription rates, including online access: United States and Canada, 1 year \$135; international, 1 year \$150.\* Rates include shipping charges. International Remail Service is standard outside of the United States and Canada. \*International nonmembers also may elect to receive an electronic-only, email delivery subscription for \$100. Single issues, January-October/November: member \$6 per issue; nonmember \$15 per issue. December issue (ceramicSOURCE): member \$20, nonmember \$40. Postage/handling for single issues: United States and Canada, \$3 per item; United States and Canada Expedited (UPS 2<sup>nd</sup> day air), \$8 per item; International Standard, \$6 per item.

POSTMASTER: Please send address changes to American Ceramic Society Bulletin, 600 North Cleveland Avenue, Suite 210, Westerville, OH 43082-6920. Periodical postage paid at Westerville, Ohio, and additional mailing offices. Allow six weeks for address changes.
