feature articles

20

Reaction-bonded boron carbide for lightweight armor: The inter-relationship between processing, microstructure, and mechanical properties

With adequate understanding of processing parameters and resulting material properties, reaction bonding offers a relatively inexpensive alternative fabrication method for lightweight ceramic armor.

by Shmuel Hayun

36

Future of high-performance ceramics—The German perspective

German academic, government, and industry experts prioritized five core applications for ceramic R&D in a roadmap and follow-up study.

by Wolfgang Rossner

27

Annual commodity summary indicates modest growth, incredible potential

Salient statistics and trends from the United States Geological Survey Mineral Commodity Summaries 2017.

by April Gocha

40

Big data meets materials science: Training the future generation

Capitalizing on the promise of “big data” will require materials scientists who are trained in data informatics. Several universities are answering the call.

by Elizabeth Dickey and Greer Arthur

30

Boron carbide-based armors: Problems and possible solutions

A critical assessment of recent advances in understanding of the nature and possible root causes of shear-induced amorphization in boron carbide for lightweight armor applications.

by Atta U. Khan, Vladislav Domnich, and Richard A. Haber

On the cover

A shattered BorLite reaction-bonded boron carbide armor plate, manufactured by Paxis Ltd. (Savion, Israel), after impact with 7.62X63 AP M2 projectiles. For more information, contact Itzhak Mutzary, CEO of Paxis, at Itzhakm@paxisceramics.com.

Reach the summit with ACerS

ACerS keeps you connected to the industry's latest news and trends—and connected to a network of 7,500 experts, practitioners, business leaders, and decision makers—the most comprehensive in the industry.

Visit www.ceramics.org to learn how ACerS can help you every step of the way.

The above image shows ACerS Fellow Ivar Reimanis on Mt. Denali in May 2016. Does the image look familiar? You may have spotted it in the ACerS booth at Ceramics Expo 2017. Turn to page 46 for a full recap of the show!

American Ceramic Society Bulletin covers news and activities of the Society and its members, includes items of interest to the ceramics community, and provides the most current information concerning all aspects of ceramic technology, including R&D, manufacturing, engineering, and marketing. American Ceramic Society Bulletin (ISSN No. 0002-7812). ©2015. Printed in the United States of America. ACerS Bulletin is published monthly, except for February, July, and November, as a "dual-media" magazine in print and electronic formats (www.ceramicbulletin.org). Editorial and Subscription Offices: 600 North Cleveland Avenue, Suite 210, Westerville, OH 43082-6920. Subscription included with The American Ceramic Society membership. Nonmember print subscription rates, including online access: United States and Canada, 1 year \$135; international, 1 year \$150.* Rates include shipping charges. International Remail Service is standard outside of the United States and Canada. *International nonmembers also may elect to receive an electronic-only, email delivery subscription for \$100. Single issues, January-October/November: member \$6 per issue; nonmember \$15 per issue. December issue (ceramicSOURCE): member \$20, nonmember \$40. Postage/handling for single issues: United States and Canada, \$3 per item; United States and Canada Expedited (UPS 2nd day air), \$8 per item; International Standard, \$6 per item.

POSTMASTER: Please send address changes to American Ceramic Society Bulletin, 600 North Cleveland Avenue, Suite 210, Westerville, OH 43082-6920. Periodical postage paid at Westerville, Ohio, and additional mailing offices. Allow six weeks for address changes.
