COVID-19 Update:

Effective February 28, 2022, the City of Chicago has removed the mask and vaccine requirements for certain public spaces. Masks will continue to be required on public transit, and in other congregate settings. The American Ceramic Society recommends wearing a mask at your comfort level at UNITECR 2022, but masks are not required. Proof of vaccination is no longer required.

Masks will be required for the UNITECR Welcome Reception at the Museum of Science and Industry in the exhibits where physical distancing is more difficult, specifically, **Coal Mine and Mirror Maze**. The American Ceramic Society will provide masks for those interested in participating in these exhibits.
