

Publish your Energy Harvesting Society Meeting research today, build upon it tomorrow.

*"International Journal of Ceramic Engineering and Science is a unique communication platform targeting engineering and science advances at all stages of ceramic and glass research and application."*

— Ricardo Castro, editor-in-chief

You worked hard on your project, but there is more to do. Or perhaps it didn't quite work out as planned. With the prestige of ACerS and broad open access readership, IJCES is the ideal peer-reviewed journal for publishing your sound science and engineering studies, including "works in progress," negative results, confirmations of previous research, reviews, and full reports.

Learn more about IJCES at <https://ceramics.org/explore-ijces>

IJCES is an open access journal, meaning your published work is immediately available to share globally. The article processing charge (APC) fee for IJCES can be up to \$1800. However, for EHS Meeting authors the APC is US\$100 due to generous underwriting by ACerS and Wiley.

IJCES is accepting EHS Meeting manuscripts for all confirmed presenters now. Go to <https://mc.manuscriptcentral.com/ijces> to begin your submission. Please submit your EHS manuscript by January 1, 2020.

Authors should mention in the cover letter that 'the contents of this manuscript was presented in EHS19 and in step 6 of the submission process.
