

2011-2017 Della Roy Lecturers

2017 Della Roy Lecturer:

Paulo Monteiro, University of California, Berkeley

Lecture title and link: “Characterization of Cementitious Materials Using X-Ray Synchrotron Radiation: What we know, what we don’t know, and what we want to know”

2016 Della Roy Lecturer:

Joe Biernacki, Tennessee Technological University

Lecture title: “What do artificial intelligence, synthetic life-chemistry and nuclear fusion have to do with cement? (a vision for things to come)”

2015 Della Roy Lecturer:

Hamlin Jennings, Massachusetts Institute of Technology

Dr. Jennings died the week before he was to give the Della Roy Lecture. His colleagues put together this [video tribute](#) recognizing the many contribution of Hamlin Jennings and showed it at the Cements meeting held at Kansas State University in July 2015.

2014 Della Roy Lecturer:

Ellis Gartner, scientific director (chemistry), Lafarge Central Research, France

Lecture title: “40 Years a Cement Scientist – Can this be Sustainable?”

2013 Della Roy Lecturer:

Leslie J. Struble, University of Illinois at Urbana-Champaign

Lecture title: “Calcium in Geopolymers”

2012 Della Roy Lecturer:

Edward Garboczi, National Institute of Standards and Technology

Lecture title: "The Computational Materials Science of Concrete: Past – Present – Future"

2011 Della Roy Lecturer:

Karen Scivener, Professor and Head of the Laboratory of Construction Materials at Ecole Polytechnique Fédérale de Lausanne (Switzerland).

Lecture title: "Modelling Hydration Kinetics of Cementitious Systems"
