

June 14–16, 2023 | Columbia University, New York, NY | ceramics.org/cements2023

13TH ADVANCES IN CEMENT-BASED MATERIALS

Topics

Sustainability through Supplementary and Alternative Cementitious Materials
Durability and service-life modeling
Cement Chemistry
CO₂ Utilization towards Carbon Neutral Concrete
Nanotechnology in Cementitious Materials
Bio-inspired cementitious materials
Advances in Rheology
Additive Manufacturing using Cementitious Materials
Materials Characterization Techniques
Smart Materials and Sensors
Computational and Data Driven Materials Science
